## Contents *cont'd*

Wheel Defects	20
07–Obsolete Material	20
23–Government Regulatory Requirement	21
31–Fire or Heat Damage per Rule 95	21
60–Flange Thin	21
61–High Impact Wheel (80-90 kips)	21
63–Tread Worn Hollow	21
62–Flange Vertical	22
64–Flange High	22
65–Wheel Out-of-Round (90 kips or greater)	23
66–Flange Cracked or Broken	23
67–Wheel Out-of-Round	23
68–Rim Cracked or Broken	23
71–Rim Shattered	23
69–Thermal Crack Extending into Plate	24
74–Thermal Cracks	24
72–Rim Spread	25
73–Rim Thin	25
75–Tread Shelled	26
76–Tread Built-up	26
77–Tread Grooved	27
78–Tread Slid Flat	27
80–Scrape, Dent, or Gouge in Wheel Surface	28
81–Wheel Out-of-Gage	28
83–Wheel With Cracked or Broken Plate	29
84–Wheel With Holes in Plate	29
85–Wheel Loose	29
89–Sub-Surface Defect	29
Welding Around Wheelsets	30
Conclusion	30
Appendix	31
