## FRONT COVER SPONSOR

MATISA

la passion du rail

The Swiss specialised track maintenance machine manufacturer MATISA Materiel Industriel SA is the pioneer of mechanised track maintenance. Established in 1945 in Crissier near Lake Geneva, MATISA is continuously developing an extensive range of machines such as Tampers, Ballast Regulators, Track Laying and Renewal Trains, Ballast Cleaners as well as Track Measuring Vehicles. Outstanding track geometry accuracy and precision, developed over more than 70 years, strengthens MATISA as a key player in the track maintenance industry.

## Do you want your article published in *European Railway Review*?

We're looking for end-user industry experts from railway operators and track infrastructure owners, plus industry association personnel, to contribute free-of-charge informative and thought-provoking articles.

Can you write about ERTMS developments, level crossing safety initiatives, infrastructure maintenance technology, or high-speed rail progress?

Contact Craig Waters, Editor, via email at [cwaters@russellpublishing.com](mailto:cwaters@russellpublishing.com) for our editorial calendar or visit [www.europeanrailwayreview.com](http://www.europeanrailwayreview.com)

## COMING UP IN THE NEXT ISSUE:

- Developments in the UK: infrastructure and operations
- Winter Operations Supplement: planning for harsh winter months
- Track condition monitoring: prediction and maintenance
- Noise & Vibrations Supplement: making the railway 'friendlier'
- SNCF Réseau: infrastructure developments in France

Plus lots more!
