SCIENCES • ENGINEERING • MEDICINE

ACKNOWLEDGMENTS

The research for this document was conducted through one or more programs administered by the Cooperative Research Programs (CRP) of the Transportation Research Board (TRB) of the National Academies of Sciences, Engineering, and Medicine:

- Airport Cooperative Research Program (ACRP) research is sponsored by the Federal Aviation Administration (FAA).
- Hazardous Materials Cooperative Research Program (HMCRP) research is sponsored by the Pipeline and Hazardous Materials Safety Administration (PHMSA).
- National Cooperative Freight Research Program (NCFRP) research is sponsored by the Office of the Assistant Secretary for Research and Technology.
- National Cooperative Highway Research Program (NCHRP) research is sponsored by the American Association of State Highway and Transportation Officials (AASHTO), in cooperation with the Federal Highway Administration (FHWA).
- National Cooperative Rail Research Program (NCRRP) research is sponsored by the Federal Railroad Administration.
- Transit Cooperative Research Program (TCRP) research is sponsored by the Federal Transit Administration (FTA) in cooperation with the Transit Development Corporation.

COPYRIGHT INFORMATION

Authors herein are responsible for the authenticity of their materials and for obtaining written permissions from publishers or persons who own the copyright to any previously published or copyrighted material used herein.

Cooperative Research Programs (CRP) grants permission to reproduce material in this publication for classroom and not-for-profit purposes. Permission is given with the understanding that none of the material will be used to imply endorsement by TRB and any of its program sponsors of a particular product, method, or practice. It is expected that those reproducing the material in this document for educational and not-for-profit uses will give appropriate acknowledgment of the source of any reprinted or reproduced material. DISCLAIMER

To facilitate more timely dissemination of research findings, this pre-publication document is taken directly from the submission of the research agency. The material has not been edited by TRB. The opinions and conclusions expressed or implied in this document are those of the researchers who performed the research. They are not necessarily those of the Transportation Research Board; the National Academies of Sciences, Engineering, and Medicine; or the program sponsors.

The Transportation Research Board, the Academies, and the sponsors of the National Cooperative Rail Research Program do not endorse products or manufacturers. Trade or manufacturers' names appear herein solely because they are considered essential to the object of the report.

This pre-publication document IS NOT an official publication of the Cooperative Research Programs; the Transportation Research Board; or the National Academies of Sciences, Engineering, and Medicine.

Table of Contents

Chapter One	1
Introduction and Major Conclusions.....	1
The Purpose of This Research	1
Project Objectives.....	1
Setting and Context	1
Need to Understand the Nature of Intercity Demand.....	2
The Influence of Theory from Social Psychology.....	3
A Framework for Long- and Short-Term Preferences in the Choice of Rail.....	3
What Are the Long-Term Values in the Analytical Framework?.....	4
Why Would Anyone Create a Unified Model?.....	5
Can the Future Market Context for Rail be Predicted?.....	5
What the Scenarios Revealed.....	6
Differences between Millennials and Older Groups in the Four Values	6
How Important Were Each of the Factors in the Explanation of Present Rail Choice?.....	6
How Did the Four Future Scenarios Address These Issues?	7
Do the Scenarios Suggest a Wide Range of Possible Future Market Contexts?	8
Key Factors Identified in this Report	9
Why are These Alternative Future Scenarios Important?	10
Additional Factors to Explore	10
The Influence of One's Peers on the Selection of Intercity Mode	10
Hedonic Considerations in the Choice of Mode	11
Rail in a Competitive Dynamic Market—What about the Competing Modes?.....	11
What Is Happening to Travel Behavior as a Whole?.....	12
The Chapter Structure of This Final Report.....	13
Chapter Two:.....	15
Previous Research, The Work Program, and The Collection of New Data	15
The Strategy Behind the Work Program.....	15
Highlights from the Project Bibliography	16
Bibliography Theme 1: Trends and Differences by Generation.....	16
Bibliography Theme 2: Long-Distance Transportation Issues	18
Bibliography Theme 3: Attitude Theories Applied to Transportation	18
Bibliography Theme 4: Hybrid Models to Integrate Attitudes	20
Bibliography Theme 5: Environmental Motivations and Strategies.....	21
Bibliography Theme 6: Information Technologies and the Productivity of Time	22
Bibliography Theme 7: Application of Market Segmentation Techniques.....	22
Data Collection Methodologies	23
Data Collected to Support the Project's Goals.....	23
Survey Sampling Frame and Eligibility Requirements	23
Sampling Sources and Procedure.....	23
Data Cleaning and Sample Size.....	24
Additional Data Collection.....	24
Additional Surveys Used in the Project	24
Design of the Survey Instrument	25
Data Needs for Activities in the Development of the Stated Preference Exercise.....	25

The Survey Instrument	26
Survey Respondent Sample Overview	26
Demographics.....	26
Characteristics of Recent Trip.....	27
Attitudinal Variables.....	29
Chapter Three.....	35
Survey Results by Demographics, Region and Market Segment	35
Relationship Between Key Demographic Categories and Survey Responses.....	35
Results by Coastal Region.....	41
Background.....	41
Sample Characteristics by Coast	42
Trip Characteristics and Attitudinal Differences by Coast	42
Latent Class Cluster Segmentation.....	45
Methodological Overview and Benefits of Latent Class Analysis	45
Results	45
Predictive Variables	45
Overview of Results	47
Description of Clusters, Ranked from Most Receptive to Least Receptive to Rail	47
Young Urbanites (11%)	47
Open to Rail (30%)	48
Curious but Cautious (15%)	48
Cars for Convenience (29%)	48
Rail Rejecters (15%)	49
Difference in Segment Composition, by Coast	49
Summary of the Market Segmentation.....	49
Chapter Four	52
Understanding Values, Preferences and Attitudes in the Choice of Rail	52
Introduction and Structure.....	52
Technical Appendix for Attitudinal Models	53
Part One: The NQRRP “Attitudinal Model” for Rail	53
Four Factors Representing Long-Term Values	54
Values and Location	55
Short-Term Attitudes Factors and the Outcome Factor	55
Running the Attitudinal Model for Rail.....	56
Interpreting the Results of the Attitudinal Model for Rail.....	56
Exploring the Interactions Between/ Among Factors.....	57
Effect of Demographics	57
Effect of Longer-Term Values	58
Effect of Shorter-Term Attitudes	58
Conclusion: The Attitudinal Model for Choice of Rail.....	59
Part Two: The Theory of Planned Behavior Model for Rail.....	60
What is the Theory of Planned Behavior?	60
Factors in the Rail TPB Model	61
Model Fit	63
Results of the Theory of Planned Behavior Model	63

Interpretation of Results, Total Sample.....	63
Understanding Normative Influences in Mode Choice	64
Understanding Hedonic Influence in Mode Choice	64
Comparing Millennials with Older Respondents.....	65
Conclusion: The TPB.....	65
Chapter Five.....	67
Merging Economic Modeling Theory with Analysis of Attitudes and Preferences	67
Part One: A Mode Choice Model with no Attitudes or Preferences.....	67
Results: Times and Costs	69
Part Two: The Integrated Choice and Latent Variable Modeling	70
Background: Activities in the Development of the IQLV.....	70
Furthering the State of the Practice in IQLV Modeling	71
Model Specification	72
Key Explanatory Variables.....	72
Latent Attitudes	73
Modal Constants.....	74
Model Results.....	75
Model Fit Statistics and Value of Travel Time Measures.....	76
Mode Constants	76
Latent Attitudes.....	78
Attitude Toward Privacy	78
Attitude Toward Auto Orientation	78
Attitude Toward Urbanism	79
Attitude Toward Information Technology	79
Summary and Conclusions.....	80
Chapter Six.....	81
Model Application for Scenario Analysis	81
Introduction.....	81
Chapter Structure	81
What Does the Tool Look Like?	81
The Four Illustrative Scenarios	82
Sample Expansion and Initial Model Calibration.....	83
Changing the Demographic Distributions	84
Changing Mode Travel Times and Costs	87
Changing Attitudinal Variables	88
Chapter Seven	91
The Role of Rail in a Rural Market	91
Rail and Bus Choice in the Smaller Corridors.....	91
The University of Vermont Rural Intercity Transportation Survey	91
Setting For the Rural Study	91
Methods	92
Rural Intercity Survey Instrument	92
Intercity Travel Mode Distributions.....	93
Components of the Rural Attitudinal Model	94
Rural Attitudinal Model Estimation	95
Results	95

Exploring Privacy and Safety in the Rural Survey	96
Conclusion for the Rural Corridor Market	97
Chapter Eight	99
Competition to Rail from Intercity Bus	99
Introduction	99
Previous Research on Intercity Bus Service	99
Bus Diversions from Rail?	100
Understanding the Role of Price	101
NCRRP Attitudinal Model for Intercity Bus Travel	102
Content of the Model	103
Explanatory Factors for Taking Bus	103
Interpreting Results From the Bus Attitudinal Model	104
Convenience and Price	104
Convenience	104
Perceived Cost	104
Privacy and Safety	105
Stress of Driving and Auto Orientation	108
Urbanism and Urban Location	108
Role of Information Technology	109
Interpretation of Results from the Bus Attitudinal Model	110
Lessons from the ICLV Model	110
Modal Constants	110
Sources	112
Chapter Nine	113
Competition Between Rail and Air	113
Structure of the Chapter	113
Introduction	113
Air/ Rail Diversion Model Background and Methodology	114
Air/ Rail Diversion Model Sensitivity Analysis	115
Sensitivity Analysis Results	116
Interpretation of the Variable Interactions	117
Elasticity	118
Case Study Example: NYC– Boston	120
Conclusion	122
Chapter Ten	125
Bringing It All Together: Where Do We Go from Here?	125
Incorporating Uncertainty into the Planning Process	126
How Do the Factors Interact?	127
Major Themes Revealed	129
Are Millennials a Market We Can Take for Granted?	129
Role of Auto Orientation	130
Role of ICT	130

Future Markets for Intercity Rail	130
Understanding Market Factors and Segments.....	131
What are the Factors that Influence Intercity Mode Choice and How Do They Interact?_	131
What are the Key Market Segments?	131
Aspects of Rail Service to Improve or "Sell" to Targeting Market Segments	132
Areas to Target to Grow Market for Rail	133
Conclusions About New Directions for Modeling.....	134
Implications from the Project for Further Research.....	134
Relationship to Issues in Rail Policy Planning.....	135
Research About Refining Future Scenario Applications	135
Research About the Tradeoffs in Rail System Design	136
Research About ICT and Rail Service	136
Relationship with Larger Question of Transportation Demand.....	137
Dealing with the Automobile	137
Acknowledging the Bus	137
Going Beyond Planning – Understanding Marketing and Advertising	138
