COMMENT

3 Quality management crisis

INTELLIGENCE

7 Main Line | SNCF confirms TGV of the Future order, ÖBB and Siemens agree 700-coach framework contract, Ferrocarril de Antofagasta renews fleet

18 Urban Rail | Bogotá metro project kicks off, Amsterdam north-south line opens, test running in Hanoi

28 Market | Contracts & Tenders

31 Industry | United Wagon Co approved to supply DB, Greenbrier-AstraRail invests in Turkey

34 Innovations | Mobile information display, catenary renewal fleet

37 Analysis | Italian government at loggerheads over Lyon – Torino base tunnel, Czech tendering gathers pace, New Jersey Transit scrambles to meet PTC deadline

GERMANY

46 Seven more years to complete Stuttgart 21 | Huge controversy has surrounded the Stuttgart 21 programme to remodel the city's rail network, but tunnelling for this ambitious project is now more than two-thirds complete

51 Ulm – Wendlingen to open in 2022 | Part and parcel of the controversial Stuttgart 21 scheme, the Ulm – Wendlingen high speed line is moving towards completion, with 75% of tunnels holed through and opening planned for December 2022

54 Reviving the rail freight market | Digital technology and political measures such as lowered track access charges are giving Germany's rail operators the chance to prove that they can play a bigger role in the freight market

59 Prototype wagons promise a quieter future | A dedicated test train with prototype low-noise wagons is clocking up the kilometres thanks to federal funding for a research programme that also targets energy-efficiency and lower life-cycle costs

62 Digitisation fever grips the rail sector | Rapid advances in the

automation of road vehicles is putting pressure on the German rail sector, which is responding with a broad range of digital initiatives. But reliance on public funding means that the transition is likely to be slower than the industry hopes, suggests Timon Heinrici

67 A vision of decarbonisation | With Germany under pressure to meet climate change targets, the rail sector is developing its vision for a new generation of regional trains that could eliminate CO₂ emissions at the point of use

70 'We want to make sustainable mobility accessible to everyone' | Having grown from a tech startup to an international coach company in just five years, FlixBus has now entered the rail market. The e-commerce platform seeks to become a multimodal provider of sustainable transport, CEO & Co-Founder André Schwämmlein tells Andrew Grantham

THE NEXT GENERATION

75 Gamification gains ground | First launched in 2015, the Track to Safety gamified driver training tool is now being deployed by Euskotren and Metro Bilbao, and is attracting interest in the international market, with a pilot due to be launched by Amsterdam urban rail operator GVB before the end of the year

79 Winning the talent battle | An ageing demographic, chronic lack of diversity, wage inflation and changes in technology are all posing a threat to the skills base of the UK rail sector. Shamit Gaiger of NSAR considers how the industry could act together to recruit and retain staff suited to a rapidly evolving industry while also upskilling the existing workforce

83 The train in Spain | Infrastructure manager ADIF is expanding its training capability with the development of a virtual reality suite at its Valencia training centre, helping to enhance its capability in disciplines including electrification and power supplies

89 Encouraging Belt & Road best practice | Launched in 2016, the MTR Academy has fostered educational links across Asia to help neighbouring countries learn from its experience operating railways in Hong Kong

93 Inspiring tomorrow's engineers | Reflecting a growing

international presence after seven successful events, the Institution of Mechanical Engineers is planning to expand its popular Railway Challenge designed to attract young engineers into the rail sector. Chris Jackson reports from Stapleford

IN FOCUS

103 Untangling the Genova Node | An additional pair of tracks through the Genova area will enable FS to segregate freight and passenger services, facilitating the operation of more intensive suburban services, reports Benjamín Zelki

107 High speed hub makes slow progress | Following a chequered development process and with criticism continuing, construction of the high speed station at Firenze Belfiore is now expected to be completed in 2022

111 Airport link plan to accelerate rail investment | With a general election in prospect early in 2019, the Thai government is proposing a standard gauge railway between three airports to show evidence of progress on major infrastructure investment

115 Win some, lose some | Steady growth of around 2.5% to 3% can be expected over the next six years, according to the latest World Rail Market Study, compiled for UNIFE by Roland Berger

INNOTRANS PREVIEW

119 Berlin biennial | We preview the world's largest rail technology exhibition as the industry gathers in Berlin on September 18-21

FORUM

152 People | MTR problems lead to management reshuffle, changes at Canadian National

155 Research & Skills | Hajj metro prepared for seven day operating season, Norfolk Southern deploys virtual training app

156 Sidetrack | Dieter

158 Diary & Contact
