THE FUTURE OF RAIL

26 Looking towards a multimodal future | The transport sector is going through a period of rapid change, driven primarily by digitalisation and decarbonisation, with a growing emphasis on multimodality. Nick Kingsley asked a panel of rail, logistics and technology specialists how rail should adapt to secure its role in the future mobility landscape

29 'Rail needs no lectures on innovation' | Urban rail faces its own challenges, which are similar yet different from those being addressed by long-distance operators, according to the rail team at UITP

30 How to restore Europe's missing border links | A study for the European Commission finds that reinstating international services across borders may not be as difficult or as expensive as previously thought

34 JR East on the path of change | Earlier this year, the board of East Japan Railway adopted a 10-year vision entitled Move UP 2027. This is expected to begin a 30-year transformation of the railway into a lifestyle service company that can meet

the changing needs of a declining and ageing population, as JR East President & CEO Yuji Fukasawa explains

POLAND & BELARUS

37 Chinese backing underpins investment | The Belarusian government is seeking to exploit the burgeoning market for Eurasian transit freight by investing in its domestic network and electrifying its principal routes. Toma Bačić investigates

40 Pesa plans a new future | Pesa is starting a new chapter as a takeover deal is finalised. The company's president Krzysztof Sędzikowski sees a bright future ahead

IN FOCUS

42 Caucasian crossroads looks east and west | With a main line upgrading project due to be completed in 2019, Georgian Railway is looking to expand its Eurasian transit business

44 Sheffield brings tram-train model to the UK | The UK's first tram-train route opened for service on October 25, linking Sheffield with Rotherham, as part of a much-delayed pilot programme

46 Automation drives an urban revolution | Digitalisation, automatic train control and passenger information systems are starting to converge as the backbone to enable demand-responsive urban rail operations. Chris Jackson reports from the Smart Metro conference in Paris
